### SUMMARY

Passionate software engineer with 5+ years of experience in developing web/desktop applications full-stack and practicing clean, concise code. Knowledgeable in programming environments ranging from C# to JavaScript. Experienced working both small and large teams across multiple projects in an agile environment.

### WORK EXPERIENCE

#### Software Engineer

Alinxsoft

March 2020 - current / New York, NY

- Contribute software engineering expertise on the development of payment portal applications for freight forwarders through SDLC, from requirement definition to successful deployments
- In charge of continuous development and management of EDI message parsing engines (software used by air cargo handling services)
- Work with core C# to develop automated solutions to include web interfaces using HTML, CSS, JavaScript
- Proficiently troubleshoot issues requested from internal support teams, achieving high satisfaction rates

#### Software Developer

The Notion Lab

February 2018 - March 2020 / New York, NY

- Developed new and maintained existing databases using a variety of technologies, languages and programming tools
- Worked on individual development projects to deliver secure, robust and scalable software that helped improve efficiency, information security, data integrity and customer satisfaction
- Designed and developed POS system solutions for over 50 clients using CSS, HTML, ASP.NET, and WPF
